

Friday 26th September

What a busy week we have had in Wrens class! In art lessons, we have continued exploring the work of Thomas Gainsborough. The children learned how to create a landscape and include a horizon. They also focused on identifying what to include in the background, middle ground, and foreground.

Wrens

In mathematics the children used part-whole models to create systematic number bonds to ten.

Little Wrens have been working hard on subitising numbers to five.

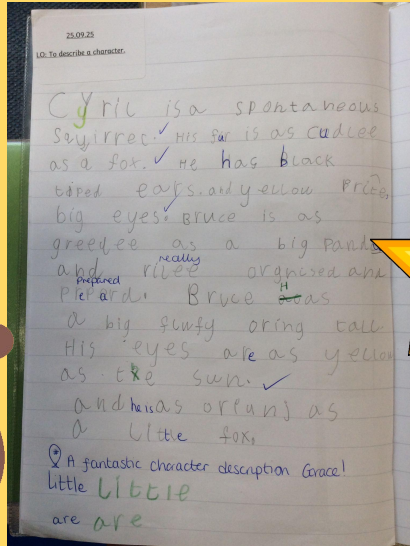

In Literacy, we have continued sharing the story *The Squirrels Who Squabbled*. The children have been working hard to describe the personality and appearance of the characters. They then created their own character descriptions.

Wrens

In Geography, we have been studying the United Kingdom and the British Isles. The children have identified and pieced together all the countries that make up the United Kingdom. They also used atlases to locate the various surrounding islands.

Grace wrote a fantastic character description. She is our star of the week!

Wrens had a fantastic time at Forest School this week, cooking couscous on the campfire. The children enjoyed it so much that some even went back for seconds!"

In Kites class we have been sharing, recommending and voting for our favourite books. This weeks winner was Percy Jackson and the lightning thief!

In music we were learning about rhythm. We learnt the cup song from the Pitch perfect movie. Ellie was able to perfect the rhythm !

In English, Kites class turned into a news conference room. We became characters from our book “Cogheart” to give witness statements about the recent Zeppelin crash!

Swifts had a wonderful time at Forest School on Thursday and particularly enjoyed using the tools, building dens, climbing trees or, in the case of Eliza, sleeping in one! She appears to doing be a brilliant impression of a sloth. Earlier in the week, taking their inspiration Fox class, Swifts made physical models to represent the Five Pillars of Islam, combining DT with RE in some excellent cross curricular learning.
