

Friday 12th December

Environmental Science - Owls

Owls also designed some wonderful christmas decorations on their plant pots and planted them up with Narcissus tete a tete. We hope they grow beautifully for the friends and family we will give them to.

Foxes have completed their final Lowry-inspired artwork, applying knowledge and skills acquired this term. Instead of industrial scenes, we created busy playground scenes using Lowry's signature colours, tints and shades along with characteristic figures. We enjoyed arranging little versions of ourselves in different sizes to create distance.

Otters and Robins did amazingly in their Nativity this week! Everyone was so amazed at their stage presence, their behaviour and how grown up they all were! Well done Otters & Robins

Otters have also enjoyed making Christmas cards this week for our local community. We worked hard to make them really special and are looking forward to going and posting them today and spreading some Christmas love!
