

# Friday 16th January

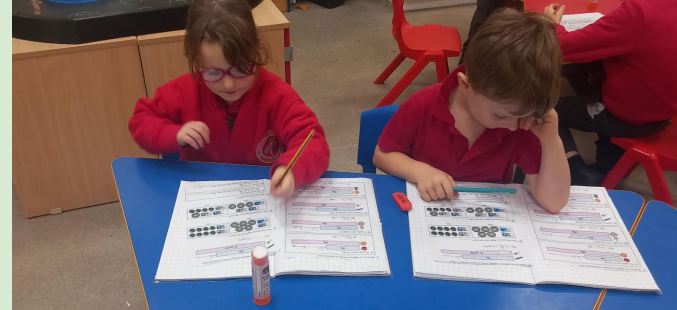

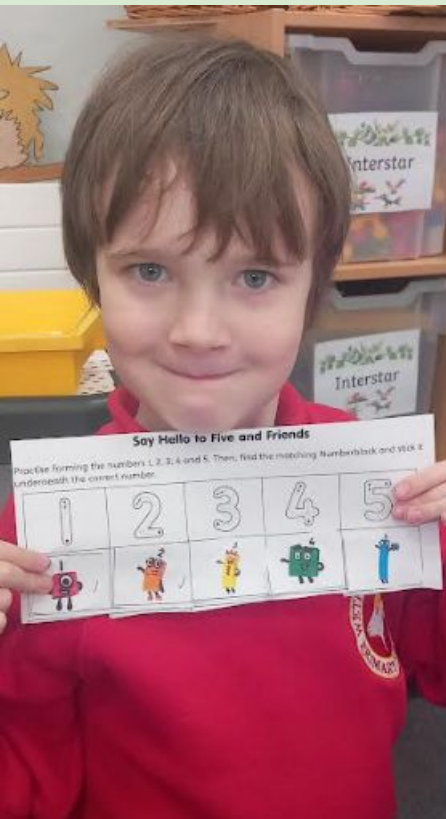

This week Swifts were investigating 'What is a cloud?' as part of their geography topic on the water cycle. After an initial discussion, they then made their own 'clouds in a jar.'  
They even made their clouds rain!

Kites have been enjoying forest school despite the weather. To keep warm, Izzy and William made their own fire which everyone then used to cook smores. The children also made good use of their skills by building a rope bridge which they hope to finish off today.

This week in Wrens we have been learning lots about money. We have been calculating change from a £1 and working super hard. Little Wrens have been learning about teen numbers and understanding how these are made up using tens and ones, then working out one more and one less. Reception have been learning to recognise their numbers to 10.

Wrens have been having a great time in PE this week with Coach Kent! They have been practicing their balancing and learning how to do teddy bear rolls and pencil rolls. They particularly enjoyed the plank challenge.

Happy Weekend Everyone!
