

Friday 9th January

Kites

Check out our snowman, snow dog and snow turtle!

We were learning about Ice Biomes and had the perfect weather to explore some of the features that we might find. We discussed the differences and similarities of our environment in the snow compared to a real Ice Biome.

Mille and Evie completing the ferris wheel.

Tiffany at the funhouse

Stirling on the rollercoaster

In Maths we had a "Funfair" themed lesson. We had to complete some multi-step problems to collect passes for the rides including a ferris wheel, the fun house, hook a duck and a rollercoaster. Stirling completed all of the rides!

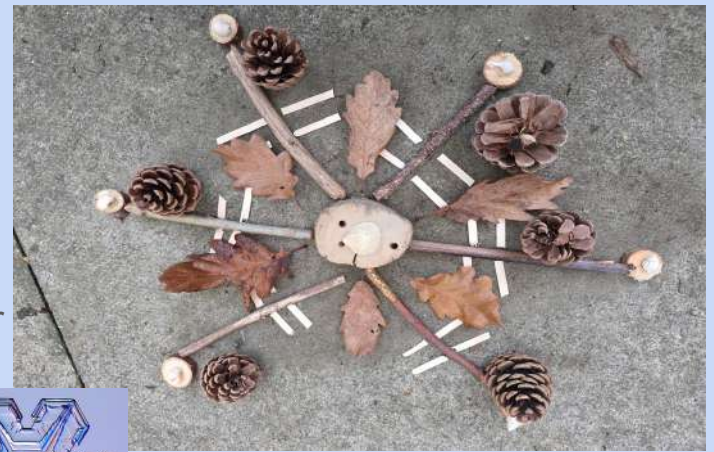

In Swifts, we have continued our incarnation unit this term, considering how the Trinity was represented in the baptism of Jesus. After looking at some artwork and discussing the symbolism of colour, we created our own abstract pictures based on a piece of original artwork (centre).

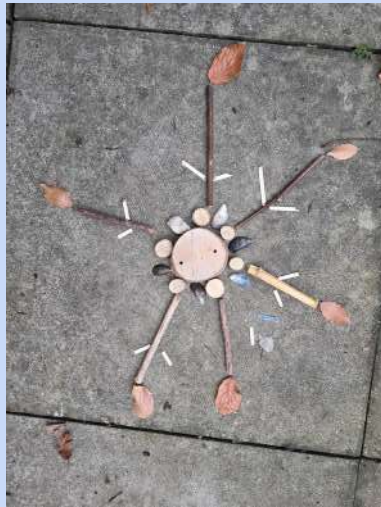

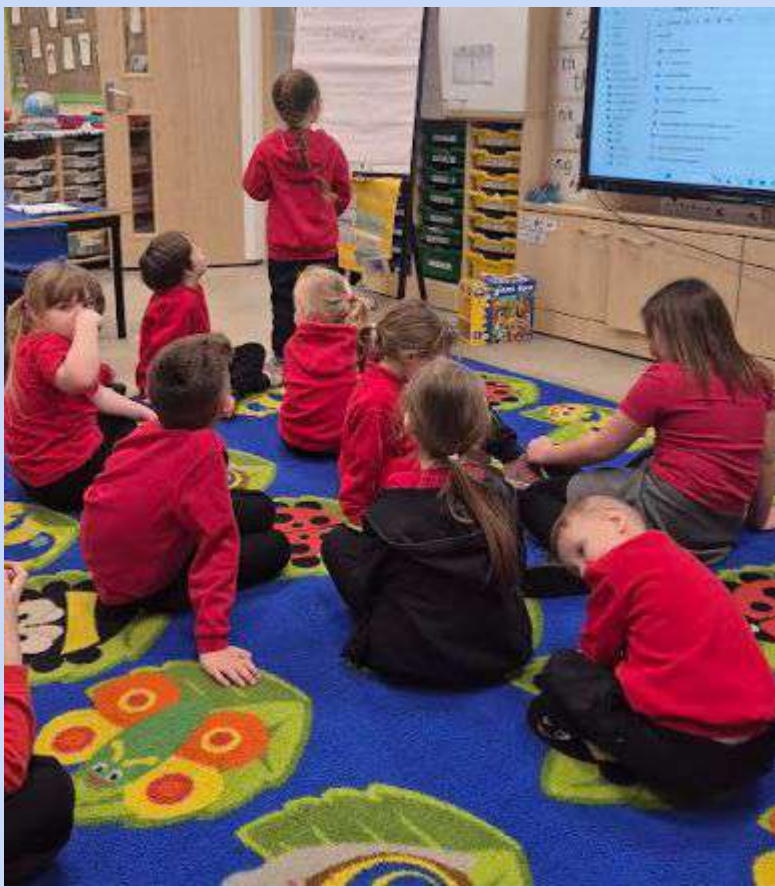

In forest school this week we learnt how snow crystals form and grow in the clouds, starting as a tiny speck of dust or pollen that water vapor gets stuck to and then freezes.

We also learnt that snow crystals always start of with a hexagon and have 6 arms or branches, but they keep changing their shapes and patterns whilst falling gently to the ground, and because of this each snow crystal is beautifully unique.

We made our own unique snow crystals using natural materials.

This week in literacy Wrens have been reading “Where the Wild Things Are” - the children made predictions about what might happen in the story, they made a list of rules that the character should follow and wrote a diary entry from the perspective of Max. Beatrice shared her ideas with the class. Little Wrens created their own Wild Things!

Following on from Monday's assembly Wrens continued to think about Epiphany. We made our own Wise Men using resources from the classroom.

We really enjoyed this activity and loved sharing our creations.
