

Friday 21st November

Wrens

This week in Wrens, the children have been demonstrating fantastic teamwork skills.

In PE, they took part in a game called *Hula Hoop Team Link*. The challenge was to pass a hula hoop all the way along their team without breaking the human chain which meant climbing in and out of the hoop while staying connected. The children worked brilliantly together, encouraging one another and showing great determination!

In CP time the children have been working together to solve puzzles and play games. Taking turns and sharing.

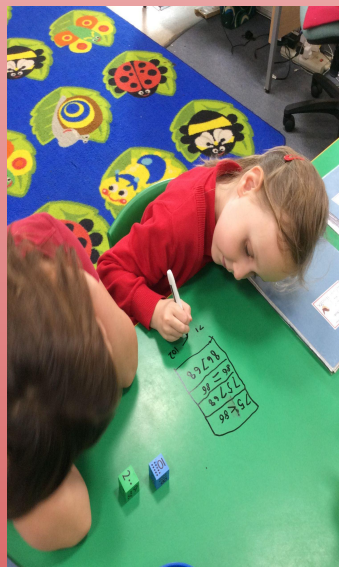

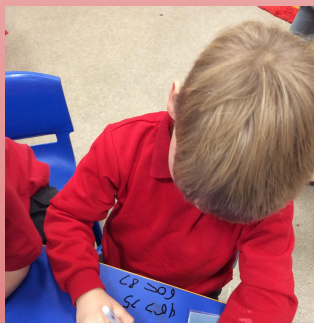

Wrens

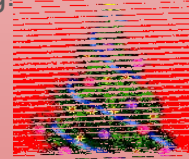

Wrens have been exploring place value up to 100 and practising comparing numbers using equality signs. They especially enjoyed showing their understanding by writing directly on the tables always a class favourite!

In mathematics this week Little Wrens have been working hard on understanding the composition of numbers to ten and place value. They worked as a team to order numbers to 20.

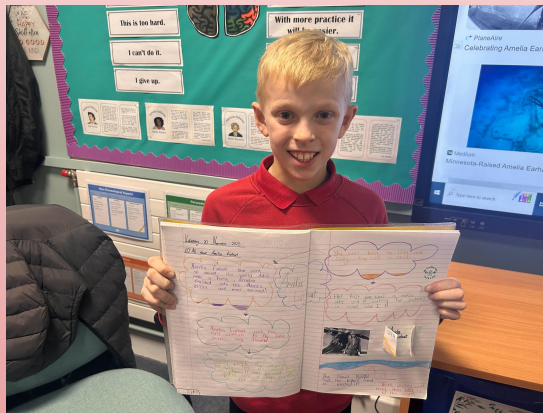

A huge thank you to Mrs Finch for designing the Christmas tree templates that the children decorated for the church Christmas tree. They will look amazing!

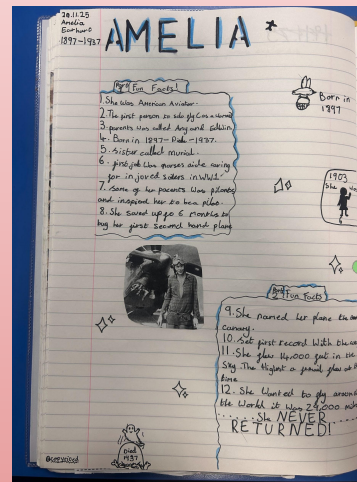

Millie found out that Amelia Earhart saved up for 6 months to buy a second hand plane to begin flying.

William wrote on his factfile that Amelia Earhart was inspired to be a pilot after looking after injured soldiers and pilots during the war.

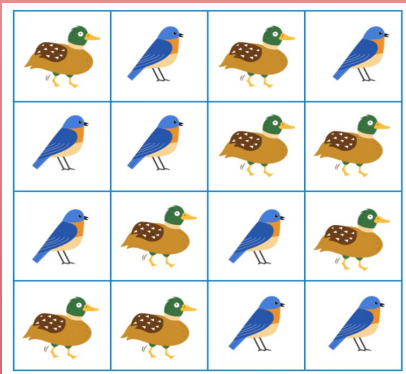

Evie's fun fact was that Amelia Earhart named her plane "The Canary" because it was yellow.

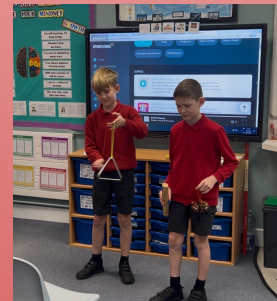

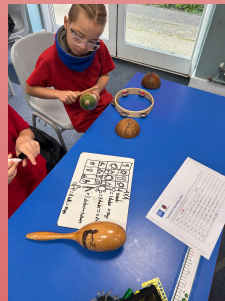

We have been looking at the explorer "Amelia Earhart" and presenting our research beautifully!

Kite class

We had a go at creating our own music grids like the one to the left. Each symbol represented a crochet or quaver. We then performed these. Shout out to Stirling who played 4 instruments by himself!

Environmental Science - Wethersfield

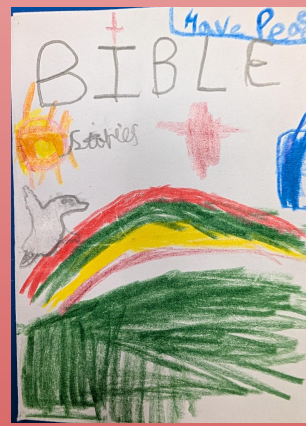

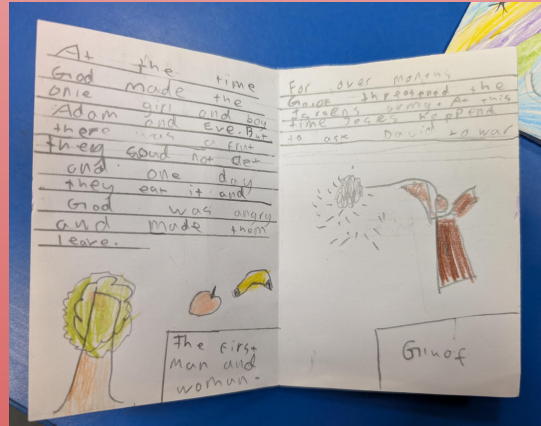

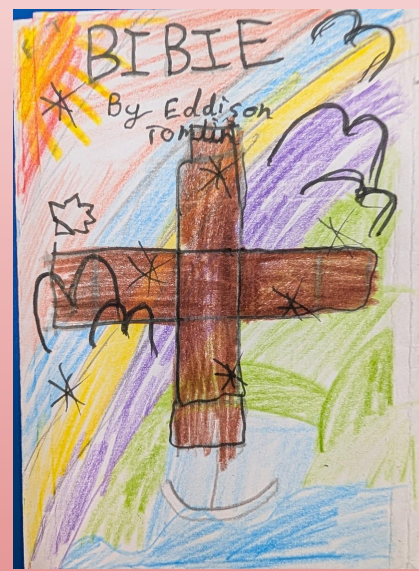

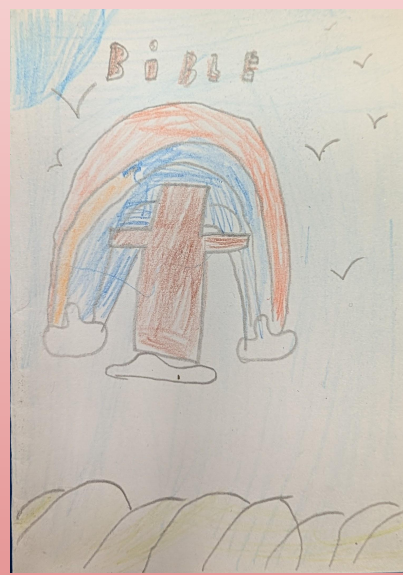

This week was all about how soil is made! We learnt how rocks and stones break up and mix with organic matter.

We used our gardening books to read about what to put on our compost heap. Then we played the compost game to test our knowledge. Both classes knew what goes on and what doesn't - Great job! Afterwards we planted broad beans, measuring where to put our seeds.

In RE Swifts designed mini books about the Bible. Inside they included interesting facts such as the number of books in the Old Testament (39 individual books) and also retold favourite stories from The Creation story in Genesis to Jesus's birth in the New Testament.
